

The Insulator Thermo-Acoustic Blanket will guard against the intrusion of heat, sound, vibration and airflow.

The Insulator consists of an all natural cotton fiber layer with surface layers of foil.

The Insulator provides up to 50% greater R-value than other reflective insulation materials. It meets Federal Motor Vehicle Safety Standards (FMVSS 302). It meets US Coast Guard standards for use in watercraft. It is also FAA approved for use in aircraft.

The Insulator can be used in automobiles, trucks, vans, RV's and motorhomes. It is also perfect for boat and aircraft applications.

Insul-Tape can be used to seal the seams between blankets and *Sticky-Stuff* spray glue can be used to attach The Insulator to surfaces.

Properties:

- Natural Cotton Fiber Construction
- Reflecting Foil Top Layer
- Radiant Heat Barrier
- Fire Retardants Added
- Size: 4 ft. x 6 ft.
- Thickness: 0.25 inch

Benefits:

- Easy To Use
- Energy Efficient
- Durable
- Light Weight
